believe.

Ir is intimated in Washington that the anxiety of the Democrats and Populists to force action upon President McKINLEY in regard to the Cuban question is due to a hope that his action might lead to a war with Spain. The demand for additional funds, which would naturally follow the inauguration of war, would give them an opportunity to press their proposition for an increase in the currency of the country.

THE most accurate business barometer is that which indicates the progress of business among the banks of the country. If their loans and discounts are heavy it is an evidence that the business men are preparing for re-entering into active business pursuits. The May reports to the Controller of the Currency show a much improved condition of the National Banks of the great cities in this particular. ns and discounts are increasing, individual deposits are heavy, and there is a general tone of improvement and an evidence of business revival which will increase from month to month when business is able to adjust itself to the new Tariff.

Republican doctrines are evidently mabing rapid inroads in the South when such a rock-ribbed Democratic paper as The New Orleans Picayone can adopt Republican Tariff principles as it does in the recent editorial which says: "The than the protection accorded it by the Dingley Bill. It has suffered severely nder the Wilson Law, as the low rates of duty do not protect domestic rice prors from the foreign rice raised by the er labor of the Orient."
